INTRODUCTION

The California Department of Education collects racial or ethnic data on public school staff and students in California in October of each year through the California Basic Educational Data System (CBEDS). This report presents a summary of the data for the state and for each county. The following characteristics may be noted from the 1991-92 data:

* Over five million students are enrolled in the public schools, 54.5 percent were reported as being members of racial/ethnic groups other than white.

* As in previous years, there are more males than females enrolled (i.e.: 51.6 percent males vs. 48.4 percent females).

* Students reported in the racial/ethnic category of white accounted for 52.5 percent of the twelfth grade graduates in 1991.

* The total number of full-time and part-time classified staff members was 239,287, of which 41.0 percent were reported as being members of racial/ethnic groups other than white.

* The number of elementary schools with 50 percent or more non-white student enrollment was 2,349 or 47.9 percent of the total. The number of high schools with 50 percent or more non-white student enrollment was 354 or 43.9 percent.
